The screenshot shows the Wing IDE interface with the following components:

- Editor:** Displays Python code for `qt_utils.py`. The current function is `gui_emit`. A red box highlights the line `ret = item[0](self, *args)`. A tooltip shows the signature for `CSideNotebookContainer.__CB_PageChanged`.
- Project Explorer:** Lists files in the project, including `qt_utils.py`.
- Stack Data:** Shows the current stack frame for `gui_emit` with variables like `args`, `cb_list`, `i`, `item`, `name`, and `self`.
- Source Assistant:** Provides documentation for the `list()` function, including the URL `https://docs.python.org/2/library/stdtypes.html#sequence-types-str-unicode-list-tuple-byarray-buffer-xrange` and the note "list() -> new empty list list(iterable) -> new list initialized from iterable's items".
